AUTHOR Gutmann, Babette; Henderson, Allison
TITLE A Summary of State Chapter 1 Participation and Achievement Information for 1985-86.
INSTITUTION Decision Resources Corp., Washington, DC.
SPONS AGENCY Department of Education, Washington, DC. Office of Planning, Budget, and Evaluation.
PUB DATE Mar 88
CONTRACT 300-86-0094
NOTE 201p.
AVAILABLE FROM Decision Resources Corporation, 1828 L Street, NW, Suite 500, Washington, DC 20036.
PUB TYPE Reports - Research/Technical (143) -- Statistical Data (110)

EDRS PRICE MF01/PC09 Plus Postage.
DESCRIPTORS Academic Achievement; Achievement Gains; Child Neglect; *Compensatory Education; Delinquency; *Educationally Disadvantaged; Elementary Secondary Education; *Federal Programs; High Risk Students; Private Schools; Program Budgeting; Program Evaluation; Public Schools; School Districts; Staff Development; State Departments of Education; *State Programs; Student Characteristics
IDENTIFIERS *Aguilar v Felton; *Education Consolidation Improvement Act Chapter 1

ABSTRACT

This document summarizes State Education Agencies' (SEA) 1985-86 State Performance Reports for Chapter 1. These reports provide data on Local Education Agency (LEA) and State Agency Neglected or Delinquent compensatory education programs, in terms of the size of the population of educationally deprived students served, the characteristics of that population and its achievement rates, staffing utilized, mix of services provided, and funding. Two major changes are reflected in this year's reports. First, as a result of the impact of the Aguilar v. Felton decision, there has been a dramatic drop--31 percent--in the number of nonpublic school students served by the LEA programs, from over 184,000 the previous year to 127,922. This decrease covered every grade span nationwide. Aggregate declines were reported by 46 states and the District of Columbia, and in 16 states dropoffs of 50 percent or more were reported. Second, all public participation and staffing figures for the years 1978-80 through 1985-86 have been revised to account for California's inclusion of data on students enrolled in the state's own compensatory education programs. Despite Aguilar V. Felton, the total number of Chapter 1 participants increased slightly. Information on the following aspects of Chapter 1 are provided: (1) services rendered; (2) staff; (3) participant composition; (4) achievement; (5) funding; and (6) State Agency Neglected or Delinquent program participants. Appendices discuss the methodology and provide additional data. Data are presented on 63 tables and figures. (BJV)

MARCH 1988

This report was prepared pursuant to Contract Number 300-86-0094, U.S. Department of Education. The cost of the project was \$75,000. The opinions and conclusions expressed in this report are those of the authors and do not necessarily represent the position or policies of the U.S. Department of Education.

ACKNOWLEDGMENTS

We wish to thank the many individuals who contributed to the completion of this report. Particularly helpful to our efforts were several individuals in the U.S. Department of Education. Howard Essl, who served as our Project Officer, and James English of the Office of Planning, Budget, and Evaluation provided us with direction and guidance throughout the study. Carol Chelemer of the Office of Compensatory Education Programs provided us with useful comments and suggestions as we developed this report.

We are also grateful to the Chapter 1 Coordinators in each state for their cooperation and assistance in verifying the information submitted on the State Performance Reports for 1985-86.

Our special thanks go to Mary Moore of Decision Resources Corporation for her continual support and advice, as well as for her invaluable contributions to the drafting of this report. Other Decision Resources Corporation staff who deserve special recognition include Leslie Anderson and Susan Hennessy for their unfailing enthusiasm in contacting the State Chapter 1 Coordinators, Julie Daft for cheerfully revising the data base and assembling tables, Christian Curtis for contributing to this report, and Saunders Freeland for her expert typing of this document.

A SUMMARY OF STATE CHAPTER 1
PARTICIPATION AND ACHIEVEMENT INFORMATION
FOR 1985-86

EXECUTIVE SUMMARY

This document summarizes State Education Agencies' (SEAs) State Performance Reports for ECIA Chapter 1. These reports provide data on LEA and State Agency Neglected or Delinquent compensatory education programs, in terms of the size of the population of educationally deprived students served, the characteristics of that population and its achievement rates, staffing utilized, mix of services provided, and funding.

Two major changes are reflected in this year's reports. First, as a result of the impact of the Aguilar v. Felton decision, there has been a dramatic drop--31 percent--in the number of nonpublic students served by the LEA programs, from over 184,000 the previous year to 127,922, a decline of more than 56,000. This decrease covered every grade span nationwide. Forty-six states, the District of Columbia, and Puerto Rico reported aggregate declines, and in 16 states, dropoffs of 50 percent or more were reported.

Second, all public participation and staffing figures for the years 1979-80 through 1985-86 have been revised to account for California's inclusion of data on students enrolled in the state's own compensatory education programs. The present report reflects this adjustment over the seven-year period.

Despite Aguilar, the total number of Chapter 1 participants nationwide increased slightly in 1985-86 over the previous year, by almost 24,000 to more than 4.5 million, continuing a trend begun in 1983-84. Prior to 1983-84, the total had declined from the record high of nearly 5 million in 1979-80. The growth in the Chapter 1 public school population--the bulk of program participants--from 1984-85 to 1985-86 occurred in the lower elementary grades, where pre-K and K participation rose 14 percent and the grades 1 through 3 totals increased 5 percent. Secondary public school participation dropped 5 percent.

In 1985-86, 74 percent of all Chapter 1 participants received reading services, maintaining a seven-year trend that shows over 70 percent of participants received reading assistance each year. Forty-four percent received mathematics services. Increases over the previous year were registered in all instructional categories except other language arts, which declined slightly. In the supporting services, attendance, social work, and guidance ranked first: 18 percent of all participants received these services. The attendance, social

work, and guidance category also registered the highest rate of growth among all supporting services--29 percent.

Total Chapter 1 staff decreased 5 percent from 1984-85 to 1985-86, although the distribution of staff by category remained nearly the same. Teachers and teacher aides made up 85 percent of the total, whereas 3 percent were administrators.

Forty-five percent of Chapter 1 students were white, 29 percent were black, and 22 percent Hispanic. Other ethnic categories made up 4 percent.

Achievement information continued to show that, with very few exceptions over the past seven years, Chapter 1 students demonstrated gains, as expressed in normal curve equivalent (NCE) scores. In 1985-86, on both annual and fall-spring test cycles, participants registered improvements in both reading and mathematics, at all grade levels, with only one exception (12th grade reading scores, on the annual test cycle). The largest increases tended to occur in the primary school grades, especially 2 through 6. The largest improvements were seen in students tested in mathematics on a fall-spring cycle, where grades 2 through 6 reported gains of from 8.8 to 13.6 NCE points.

Nationally, there was a 7 percent increase in funding for Chapter 1 LEA programs, from nearly \$3.0 billion to almost \$3.2 billion. The Chapter 1 dollars per participant figure was \$704 in 1985-86, a 6 percent increase over the previous year.

Data on State Agency Neglected or Delinquent (N or D) programs for 1985-86 indicate there were almost 53,000 participants. Of these, 61 percent were classified as delinquent, 35 percent were adult correctional participants, and 4 percent were identified as neglected. Over 60 percent of all N or D participants received reading and mathematics services, and among supporting services, the most frequently provided was attendance, social work, and guidance, which was received by 20 percent of the participants. Forty-six percent of the N or D participants were black, 36 percent white, 15 percent Hispanic, and 1 percent American Indian or Alaskan Native.

INTRODUCTION

Chapter 1 of the Education Consolidation and Improvement Act (ECIA) of 1981 (formerly ESEA Title I) is the largest program of federal education aid to elementary and secondary school students. This report summarizes the 1985-86 State Performance Reports for ECIA Chapter 1 Local Education Agencies (LEAs) and State Agency Neglected or Delinquent compensatory education programs. Information is also presented on changes from 1984-85 to 1985-86 for all data items and seven year trends for selected data items (school years 1979-80 to 1985-86).¹

Evaluation requirements have been part of the law from its beginning, but states were not required to report to the federal government in a uniform way until 1979. Beginning with the 1979-80 school year, each State Education Agency (SEA) compiled reports from each of its school districts (or from a representative sample of its districts) and submitted a state report to the U.S. Department of Education.²

The information for the 1985-86 school year was submitted by SEAs in the winter and early spring of 1987. For the LEA programs, information was reported on the number of participants (by gender, year of birth, ethnicity, and grade by public/nonpublic designation), the types of services provided (by institutional designation), the number of staff, and achievement. For the State Agency Neglected or Delinquent programs, information was collected on the number of participants (by gender and age), and the type of services provided (by institutional designation).

The SEAs are required to submit the above information to the U.S. Department of Education in a standard format except that they can submit achievement information in any format they desire. However, many SEAs continue to use the standard format required under ESEA Title I (the antecedent program) for reporting achievement data.

¹In 1985-86, State Performance Reports were received from the 50 states, the District of Columbia, Puerto Rico, and the Bureau of Indian Affairs.

²If a state samples its school districts for reporting participation and staffing information, then the inclusion or exclusion of districts in any reporting year may account for fluctuations in the figures from year-to-year. In 1985-86, three states--Arizona, Georgia, and Tennessee--reported State Performance Report participation and staffing information based on a sample of school districts.

There are two special items to note in this document. First, the 1985-86 State Performance Reports are the first ones to provide information following the Aguilar v. Felton decision. As a result of the impact of this decision, the national figures pertaining to nonpublic participants have shown a significant decrease from the prior year (1984-85) to the current year (1985-86).

Second, for the past seven years, the figures submitted by California have included participants in both Chapter 1 programs and state compensatory education programs. Through negotiations, the U.S. Department of Education and the California State Department of Education reached an agreement to reduce the public school participation and staffing figures. The ratio of the appropriate year's Chapter 1 allocation to the total Chapter 1 and state compensatory education allocations was used to reduce the public participation and staffing figures for the years 1979-80 through 1985-86. (The ratio ranged from .457 in 1979-80 to .504 in the last three years.) This report contains these adjusted total figures. As a result, the public school participation and staffing figures presented here do not correspond with those found in any previous documents displaying the State Performance Report information.³

The report contains four chapters and four appendices. Chapter 1 presents the participation information for LEA programs in three ways: (1) for 1985-86, (2) changes from 1984-85 to 1985-86, and (3) seven-year trends. Chapter 2 provides the achievement information for LEA programs for 1985-86 and for the seven-year period from 1979-80 to 1985-86. Chapter 3 shows funding information for the Chapter 1 LEA programs, and Chapter 4 provides participation information for State Agency Neglected or Delinquent programs for 1985-86. Appendix A describes the procedures that were used to edit and review the 1985-86 information. Appendix B presents state-by-state listings of selected participation information for LEA programs for 1979-80 to 1985-86. Appendix C provides additional achievement information for LEA programs for 1985-86, while Appendix D provides additional achievement data at the national level for the seven-year period.

³California's reported total number of Chapter 1 participants was reduced approximately 400,000 in each of the seven years.

CHAPTER 1

PARTICIPATION PATTERNS FOR CHAPTER 1 LEA PROGRAMS

This chapter presents participation information on Chapter 1 LEA programs for 1985-86, and describes changes in participation patterns from 1984-85 to 1985-86 and seven-year trends (1979-80 to 1985-86) in selected areas. The information is presented in the following order: overall student participation patterns, Chapter 1 service patterns, Chapter 1 staffing patterns, and characteristics of Chapter 1 students (ethnicity, year of birth, and gender).

OVERALL PARTICIPATION PATTERNS

Numbers of Chapter 1 Students

The number of Chapter 1 students in the nation has fluctuated over the last seven years, but recent numbers have remained fairly stable at the 4.5 million level.

In school year 1985-86, 4,524,948 students participated in the Chapter 1 LEA program, a 1 percent increase over the previous year's level. This increase of 23,955 Chapter 1 students was smaller than the 2 percent increase experienced in the previous school year. (Table 1.1)

Over the seven-year period, total Chapter 1 participation was highest in 1979-80 with over 4.9 million students enrolled in the program. By the 1982-83 school year, participation had declined to a low of almost 4.3 million students. Since that year, program enrollments have increased annually to their present level. (Table 1.1)

Public/Nonpublic Participation

The number of nonpublic school students participating in Chapter 1 decreased significantly in the 1985-86 school year, most likely in response to the Supreme Court's Aguilar v. Felton decision restricting on-site services to students attending private sectarian schools.

Nationally, 11 percent of students enrolled in public schools in 1985-86 were Chapter 1 students. This percentage varied by state, ranging from a high of 38 percent in Puerto Rico and 20 percent in Mississippi to a low of 4 percent in Alaska and Wyoming. In 16 states, the District of Columbia, and Puerto Rico, 11 percent or more of the students enrolled in public schools were Chapter 1 participants (the majority of

southern states fell in this category). (Table 1.2 and Figure 1)

Changes from 1984-85 to 1985-86

From 1984-85 to 1985-86, the number of public school participants increased 2 percent (an increase of 80,565 pupils), while the number of nonpublic school participants decreased 31 percent (or 56,610 pupils). This decline, which was distributed evenly across grade spans, resulted in a full percentage point drop (from 4 percent to 3 percent) in the percent of private school students comprising Chapter 1's total enrollment in 1985-86. (Table 1.3)

Public school increases in Chapter 1 participation from 1984-85 to 1985-86 occurred in 29 states, the District of Columbia, and Puerto Rico. These increases ranged from a 1 percent increase in North Dakota and West Virginia to a 30 percent increase in Nebraska.⁴ Twenty-one states and BIA experienced declines in Chapter 1 public school participation, ranging from 1 percent (Arkansas, Massachusetts, Minnesota, and Oklahoma) to 15 percent (Bureau of Indian Affairs).⁵ (Table 1.4)

Decreases in nonpublic school participation levels occurred in 46 states, the District of Columbia, and Puerto Rico in 1985-86. The decreases ranged from 5 percent or less in three states (Illinois, North Carolina, and Ohio) to 80 percent or more in two states (Alabama and Arkansas). Fifteen states reported decreases of 50 percent or more in nonpublic enrollment. An examination of the year-to-year changes in the four states whose combined participants comprised over one-half of the total nonpublic Chapter 1 population shows that California decreased 43 percent, New Jersey dropped 38 percent, New York declined 21 percent, and Pennsylvania decreased 18 percent. (Table 1.5)

Seven-Year Trends

Since 1979-80, nonpublic and public school participation levels fluctuated, but not according to the same pattern. For example, from 1979-80 to 1980-81, public school participation decreased while the nonpublic school numbers increased.

⁴Since Arizona samples its school districts for participation information, the public school increase of 40 percent in that state may be due to the inclusion or exclusion of districts from one year to the next.

⁵Since Georgia samples its school districts for participation information, the public school decrease of 28 percent in that state may be due to the inclusion or exclusion of districts from one year to the next.

Conversely, from 1983-84 to 1985-86, the public school numbers increased while nonpublic school participation declined. The largest single year decrease in nonpublic school participation (31 percent) occurred in 1985-86. (Table 1.1)

Grade Level Participation

Both public and nonpublic participation in Chapter 1 continues to be concentrated in the elementary grades. Pre-K and K public school participation levels increased the most in 1985-86.

In 1985-86, 8 percent of the public school participants were in pre-kindergarten (pre-K) and kindergarten (K), 70 percent were in grades 1 through 6, 17 percent were in grades 7 through 9, and 5 percent in grades 10 through 12. The distribution of nonpublic school participants by grade span shows a slightly higher proportion of nonpublic school participants in the elementary grades than among public school participants--5 percent attended pre-K and K, 78 percent were in grades 1 through 6, 14 percent in grades 7 through 9, and 3 percent in grades 10 through 12. (Table 1.3 and Figure 2)

Public school participation in the lower elementary grades experienced the largest percentage increase--pre-K and K participation increased 14 percent. For grades 1 through 3, participation grew 5 percent. At the same time, public school secondary Chapter 1 enrollments (grades 7 through 12) dropped 5 percent. (Table 1.3)

Participants categorized as ungraded accounted for less than 1 percent of the total number of public school participants. However, ungraded participation levels revealed a large percentage increase over the previous year. This increase was due primarily to two states reporting relatively large numbers of ungraded Chapter 1 students in 1985-86.⁶ (Table 1.3)

⁶Michigan reported 1,268 ungraded--1 percent of the state's total public school participation, and Nebraska reported 963 ungraded pupils receiving Chapter 1--4 percent of the state's total public school participation.

^{a/} Guam reported participant information in 1979-80 and 1980-81; the Trust Territories reported participant information in 1979-80, 1980-81, 1981-82, and 1983-84; and the Virgin Islands reported participant information in 1979-80.

^{b/} By-pass students in Missouri and Virginia were not included prior to 1983-84.

^{c/} The numbers for nonpublic participants in California for 1983-84 were adjusted to reflect the average of the numbers reported for the years 1982-83 and 1984-85.

^{d/} The 1985-86 State Performance Reports are the first ones to provide information following the Aguilar v. Felton decision.

^{a/} The 1985-86 State Performance Reports are the first ones to provide information following the Aguilar v. Felton decision.

Figure 2

Chapter 1 Participation By Grade Span Public And Nonpublic—1985-86

CHAPTER 1 SERVICE PATTERNS

Instructional Services

Similar to patterns in previous years, almost three-quarters of all Chapter 1 participants received reading in 1985-86, while just under one-half received mathematics. Only 15 percent received other language arts or other instructional services.

Patterns in 1985-86

In 1985-86, just over 3.3 million students, or 74 percent of all Chapter 1 participants, received Chapter 1 reading and almost 2 million, or 44 percent, received mathematics funded by Chapter 1. During the same school year, other language arts and other instructional services were received by 15 percent of all Chapter 1 students. (Table 1.6 and Figure 3)

Changes from 1984-85 to 1985-86

The student participation rates in all these services, except for other language arts, increased over the preceding school year (1984-85). The largest increase (21 percent) occurred in the category of other instructional services. Four states accounted for most of the large increase from 1984-85 to 1985-86 in other instructional services: California, Michigan, Puerto Rico, and Texas. Each reported increases of over 10,000 students in this service category. SEAs included in this category such services as early childhood, preschool, kindergarten, readiness, tutoring, dropout prevention, and English to limited English speaking students. The total number of Chapter 1 pupils receiving other language arts declined 1 percent. (Table 1.6)

Seven-Year Trends

Looking across the seven years since school year 1979-80, only the category of other instructional services fluctuated significantly. Reading, other language arts, and mathematics participation levels assumed a stable pattern. For example, the percentage of Chapter 1 participants enrolled in reading declined through 1981-82, the last year of Title I, but increased to the current level beginning in 1982-83. The category of other instructional services showed no year-to-year consistency and has ranged from 6 to 15 percent of the Chapter 1 population receiving services. However, the increase from 1983-84 to 1984-85 can be partially explained by ED's

elimination of three reporting categories from one year to the next.⁷ (Table 1.7)

Supporting Services

Smaller percentages of Chapter 1 students received supporting services than received instructional services in 1985-86, but the proportion of all Chapter 1 pupils participating in supporting services increased from 1984-85. Nevertheless, the percent of students who received supporting services remained beneath the levels reported for these services in 1981-82.

Patterns in 1985-86

Slightly over 800,000 students, or 18 percent of all Chapter 1 students, received attendance, social work, and guidance services from Chapter 1 LEA programs in 1985-86. Smaller numbers of pupils received health and nutrition (13 percent), transportation (4 percent), and other supporting services (7 percent). (Table 1.6 and Figure 3)

Changes from 1984-85 to 1985-86

Attendance, social work, and guidance services registered the largest increase in participation (29 percent) from the previous school year. Six states accounted for the bulk of this increase in attendance, social work, and guidance services: Illinois, Louisiana, Michigan, New York, Pennsylvania, and Texas. (Officials in the Illinois SEA explained the increase in attendance, social work, and guidance services as a result of service patterns in Chicago.) (Table 1.6)

Compared to participation levels in 1984-85, other supporting services' participation grew by 24 percent, health and nutrition by 16 percent, and transportation by 15 percent in 1985-86. Four states accounted for the majority of the increase in other supporting services. Kentucky, Louisiana, Puerto Rico, and Texas each reported increases of more than 10,000 students receiving services in this category. Not all states reported such increases, however. Large decreases (more than 10,000 pupils) were reported by Illinois and Oregon. (Illinois officials indicated that a redefinition of the category accounted for this decline, while Oregon officials noted that one school district had discontinued funding a

⁷Year-to-year changes in the other instructional services category can be explained, in part, by the rather large fluctuations in the numbers reported by California.

program that offered other support services to youngsters.)
(Table 1.6)

A similar pattern characterized participation data for health and nutrition services as well as transportation services. Large increases in three states (Florida, Louisiana, and Texas) in the numbers receiving health and nutrition services were offset, in part, by decreases in other states (notably California and Puerto Rico). (States with increases attributed the growth in this category to implementation of a preschool screening program in one district (Florida), and several school districts adding a health program (Louisiana).)
(Table 1.6)

In the transportation category, large increases in four states (Michigan, New York, Puerto Rico, and Texas) were offset, in part, by large decreases in three states (Florida, Louisiana, and Maryland). (States with decreases cited the presence of the World's Fair during the 1984-85 school year (Louisiana) and the discontinuation of transportation services in one large school district (Maryland).) (Table 1.6)

Seven-Year Trends

Seven-year trends for supporting services indicated that the categories of attendance, social work, and guidance and other supporting services fluctuated annually, with no consistent pattern of increase or decrease. Participation in health and nutrition services fell off sharply between 1979-80 and 1982-83 but remained at around 13 percent in subsequent years. Transportation services have hovered in a stable range between 3 and 6 percent across the seven-year period.
(Table 1.7)

Services for Public and Nonpublic Students

In 1985-86, participation of nonpublic Chapter 1 students declined from the 1984-85 level in all service categories but transportation. This decline contrasts with a pattern of growth in all service categories for public school participation.

Slightly over 87,000 nonpublic school Chapter 1 participants received reading (68 percent of total nonpublic participants) and over 43,000 received mathematics (34 percent) in school year 1985-86. In the supporting services categories, 9 percent of nonpublic Chapter 1 students received attendance, social work, and guidance services and 8 percent received health and nutrition services. (Table 1.8)

In each category of service, the percentage of nonpublic students participating is lower than the comparable percentage of public school participants. (Tables 1.8 and 1.9)

Decreases in the number of nonpublic school Chapter 1 students receiving services from 1984-85 to 1985-86 were reported in all categories except transportation. These decreases ranged from 9 percent in attendance, social work, and guidance to 58 percent in other language arts. In contrast, transportation services to nonpublic school participants increased by 160 percent (from 1,351 pupils to 3,516 pupils). This increase was primarily a result of a large increase reported by Puerto Rico (from 787 participants to 2,088 participants). Transportation increases of lesser magnitude were reported by 16 other states. These ranged from an increase of 8 participants in South Carolina to 341 in Pennsylvania. (Table 1.8)

Public school participation levels increased across all categories of service between school year 1984-85 and 1985-86. These increases ranged between 3 and 29 percent. Because public school participants comprised the vast majority of total participants reported for the service areas, public school Chapter 1 participation levels for each category of service follow the patterns previously noted for total participation. Increases in the instructional areas of reading, other language arts, and mathematics ranged from 3 to 5 percent. The category of other instructional services increased by 21 percent. Relatively large increases were experienced in the supporting services categories for public school students, ranging from 29 percent in attendance, social work, and guidance to 14 percent in transportation. (Table 1.9)

Looking across the seven years since school year 1979-80, more Chapter 1 students, both public and nonpublic, received reading than mathematics services. Participation levels in reading and mathematics remained relatively stable for both public and nonpublic participants. (Figure 4)

Services for Neglected or Delinquent (N or D) Students

In 1985-86, service patterns for N or D students resembled those for Chapter 1 students in general with more N or D students enrolled in instructional programs than supporting services. Within instructional services, the largest number of N or D students received reading, while within the supporting services area, the largest number received attendance, social work, and guidance.

The largest number of local N or D participants received reading in 1985-86 (around 59,000). Almost 49,000 local N or D participants received mathematics. Almost equal numbers of N or D students received other language arts and other instructional services (approximately 24,000 and 27,000, respectively). In the supporting services, close to 12,000

received attendance, social work, and guidance; few participants received services in the other supporting categories.⁸ (Table 1.10)

⁸The percent of local N or D participants receiving each service is not included in this report because complete figures on the total number of local N or D participants were not available. While states reported the number receiving each service, some states did not report the unduplicated number of participants.

Unduplicated Participant Count	4,316,461		4,397,026		

^{a/} The large increase in the number receiving other instructional services (106,683) is due primarily to increases in four states--California increased by 26,601 (from 76,239 to 102,840), Michigan increased by 11,526 (from 1,167 to 12,693), Puerto Rico increased by 48,447 (from 295,588 to 344,035), and Texas increased by 17,867 (from 12 to 17,879). These four states accounted for 98 percent of the increase.

^{b/} The large increase in the number receiving attendance, social work, and guidance services (176,948) is due primarily to increases in six states--Illinois increased by 24,138 (from 52,420 to 76,558), Louisiana by 11,254 (from 26,029 to 37,283), Michigan by 18,016 (from 7,032 to 25,048), New York by 37,229 (from 0 to 37,229), Pennsylvania by 9,304 (from 60,906 to 70,210), and Texas by 63,106 (from 1,490 to 64,596). These six states accounted for 92 percent of the increase.

^{c/} Three states reported large increases in the number receiving health and nutrition--Florida increased by 14,841 (from 1,765 to 16,606), Louisiana increased by 13,893 (from 17,166 to 31,059), and Texas increased by 87,670 (from 1,976 to 89,646). Nationally, these increases were offset, in part, by decreases in other states; the largest decreases were in California (a decrease of 14,821--from 151,050 to 136,229), and in Puerto Rico (a decrease of 6,798--from 144,393 to 137,595).

Table 1.9 (continued)

- d/ Four states reported large increases in the number receiving transportation services--Michigan increased by 5,706 (from 7,412 to 13,118), New York increased by 7,020 (from 0 to 7,020), Puerto Rico increased by 27,231 (from 54,177 to 81,408), and Texas increased by 10,553 (from 0 to 10,553). Nationally, these increases were offset, in part, by decreases in other states; the largest decreases were in Florida (a decrease of 3,091--from 8,285 to 5,161), Louisiana (a decrease of 4,478--from 4,526 to 48), and Maryland (a decrease of 20,010--from 26,209 to 6,199).
- e/ Four states reported large increases in the number receiving other supporting services--Kentucky increased by 13,140 (from 0 to 13,140), Louisiana increased by 13,232 (from 70,426 to 83,658), Puerto Rico increased by 19,604 (from 42,468 to 62,072), and Texas increased by 31,230 (from 0 to 31,230). Nationally, these increases were offset, in part, by decreases in other states; the largest decreases were in Illinois (a decrease of 14,360--from 15,383 to 1,023) and Oregon (a decrease of 10,498--from 10,498 to 0).

^{a/} Percent served is not reported on this table because complete figures on the total number of local N or D participants were not available. While states reported the number receiving each service, some states did not report the unduplicated number of local N or D participants.

^{b/} The increase in the number receiving attendance, social work, and guidance services is due primarily to an increase in New Jersey (from 0 to 5,721 participants).

^{c/} The increase in the number receiving other supporting services is due primarily to an increase in California (from 0 to 2,001 participants).

CHAPTER 1 STAFFING PATTERNS

Staff Composition

In 1985-86, teachers and teacher aides comprised the vast majority of staff funded by Chapter 1. Teachers constituted almost one-half of total staff funded by Chapter 1 dollars.

Teachers and teacher aides accounted for 85 percent of the total FTE Chapter 1 staff in 1985-86, while administrators constituted only 3 percent of total FTE staff. Teachers comprised the largest category of staff funded by Chapter 1 (47 percent) and teacher aides constituted the next largest group (38 percent). Each of the remaining categories of staff (administrative, curriculum specialists, supporting, clerical, and other) comprised no more than 5 percent of the total. (Table 1.11 and Figure 5)

Changes in Staff Composition

The total number of staff funded by Chapter 1 in 1985-86 decreased from the previous year's level. Teachers continued to constitute a growing percentage of total staff in 1985-86, while teacher aides continued to represent a declining percentage of total staff.

Total staff decreased 5 percent from 1984-85 (almost 154,000 staff) to 1985-86 (slightly over 146,000 staff). However, the distribution of staff by category in the two years was nearly the same. (Table 1.11)

Decreases were experienced among administrators (21 percent), teachers (5 percent), teacher aides (6 percent), and clerical staff (8 percent). While teachers and teacher aides decreased from the previous year, the total number of Chapter 1 students increased 1 percent. Staff increases were reported among curriculum specialists (6 percent), supporting staff (3 percent), and other staff (6 percent). (Table 1.11)

Over the seven years since 1979-80, total FTE staff declined steadily each year (from about 190,000 to about 146,000) with the exception of the 1984-85 school year, when an increase was reported. Although the number of teachers fluctuated across this period, the number of teacher aides decreased each year except during 1984-85, when a 7 percent increase was reported over the previous year. (Table 1.12)

Teachers comprised a growing percentage of Chapter 1 staff over the seven years since 1979-80 (from 41 percent in 1979-80 to 47 percent in 1985-86), while teacher aides accounted for

a declining percentage of total staff (from 44 percent in 1979-80 to 38 percent in 1985-86). (Table 1.12)

In a number of states, however, teacher aides continued to constitute a large percentage of the total Chapter 1 staff. In 14 states in 1985-86, the percentage that teacher aides comprised of the total staff exceeded the percentage that teachers comprised of the total staff by over 15 percent. In Indiana, for example, 79 percent of the staff were teacher aides, while 17 percent were teachers. In contrast, there were 24 states in 1985-86 in which the percentage that teachers comprised of the total staff exceeded the percentage that teacher aides comprised of the total staff by over 15 percent. In Iowa, for example, 91 percent of the staff were teachers, while only 7 percent were teacher aides. (Appendix Table B.1)

1985-86	68,424	47	54,884	38	146,327

^{a/} Guam reported staff information in 1979-80 and 1980-81; the Trust Territories reported staff information in 1979-80, 1980-81, 1981-82, and 1983-84; and the Virgin Islands reported staff information in 1979-80.

^{b/} Total staff includes teachers, teacher aides, administrators, curriculum specialists, supporting staff, clerical staff, and other staff.

CHARACTERISTICS OF CHAPTER 1 STUDENTS

Ethnicity

In 1985-86, 55 percent of Chapter 1 students were nonwhite--29 percent were black, 22 percent were Hispanic, and 4 percent were American Indians or Alaskan Natives and Asians or Pacific Islanders. Whites comprised 45 percent of the total.⁹ (Table 1.13 and Figure 6)

Year of Birth

For the year of birth information reported by states in 1985-86, 66 percent of Chapter 1 students were born between 1974 and 1979, the years that can be considered to contain children of elementary school age, while 27 percent were born between 1968 and 1973, the years that can be considered to contain children of secondary school age.¹⁰ (Table 1.14)

Seven percent of Chapter 1 participants were born in the years 1980 to 1984, which can be considered to contain children eligible for kindergarten or younger. Chapter 1 students born in 1964 through 1967 can be considered to be 18 years and

⁹In 1985-86, the total number on Table 1.13 will not correspond to the total on Table 1.1 for two reasons. First, by-pass students were included in the number by grade, but not the number by ethnicity. By-pass participants were added in Missouri (2,902 participants) and Virginia (694 participants). Second, in 17 states, the total number reported by ethnicity was not the same as the total number reported by grade (including Vermont, which did not report ethnicity information). The largest differences were in California (which reported 5,039 fewer participants by ethnicity than by grade) and Missouri (which reported 10,333 more participants by ethnicity than by grade). (Officials in the Missouri SEA explained that they were working with their school districts to reconcile the differences.)

¹⁰The total number on Table 1.14 will not correspond to the total in 1985-86 on Table 1.1 for two reasons. First, by-pass students were included in the number by grade, but not the number by year of birth. By-pass participants were added in Missouri (2,902 participants) and Virginia (694 participants). Second, in 14 states, the total number reported by year of birth was not the same as the total number reported by grade. The largest differences were in California (which reported 6,156 fewer participants by year of birth than by grade) and Missouri (which reported 9,950 more participants by year of birth than by grade). (Officials in the Missouri SEA explained that they were working with their school districts to reconcile the differences.)

older; this age group constituted 1 percent of the Chapter 1 participants. (Table 1.14)

Gender

For the gender information reported by states in 1985-86, 56 percent of the Chapter 1 participants were male.¹¹ (Table 1.15)

¹¹The total number on Table 1.15 will not correspond to the total in 1985-86 on Table 1.1 for two reasons. First, by-pass students were included in the number by grade, but not the number by gender. By-pass participants were added in Missouri (2,902 participants) and Virginia (694 participants). Second, in 15 states, the total number reported by gender was not the same as the total number reported by grade. The largest differences were in California (which reported 6,749 fewer participants by gender than by grade) and Missouri (which reported 10,333 more participants by gender than by grade). (Officials in the Missouri SEA explained that they were working with their school districts to reconcile the differences.)

Table 1.13

Chapter 1 Participants by Ethnic Classification -- 1984-85 and 1985-86

Ethnic Classification	1984-85		1985-86		Percent Change in Number
	Number	(Percent ^{a/})	Number	(Percent ^{a/})	
American Indian or Alaskan Native	76,901	(2)	80,957	(2)	5
Asian or Pacific Islander	82,505	(2)	93,933	(2)	14
Black, not Hispanic	1,220,715	(30)	1,286,128	(29)	5
Hispanic	807,200	(20)	1,005,667	(22)	25
White, not Hispanic	1,915,271	(47)	2,042,590	(45)	7
Total ^{b/}	4,102,593	(100)	4,509,275	(100)	10

^{a/} Percents may not add to 100 due to rounding.

^{b/} Two states (New York and Vermont) did not report ethnic data in 1984-85, and one state (Vermont) did not report these data in 1985-86. Year-to-year changes are due, in part, to the inclusion of New York's data in 1985-86 only.

In 1985-86, the total number on this table will not correspond to the total on Table 1.1 for two reasons. First, Chapter 1 by-pass students were included in the number by grade, but not the number by ethnicity. By-pass participants were added in Missouri (2,902 participants) and Virginia (694 participants). Second, in 17 states, the total number reported by ethnicity was not the same as the total number reported by grade (including Vermont). The largest differences were in California (which reported 5,039 fewer participants by ethnicity than by grade) and Missouri (which reported 10,333 more participants by ethnicity than by grade).

^{b/} The total number on this table will not correspond to the total in 1985-86 on Table 1.1 for two reasons. First, Chapter 1 by-pass students were included in the number by grade, but not the number by gender. By-pass participants were added in Missouri (2,902 participants) and Virginia (694 participants). Second, in 15 states, the total number reported by gender was not the same as the total number reported by grade. The largest differences were in California (which reported 6,749 fewer participants by gender than by grade) and Missouri (which reported 10,333 more participants by gender than by grade).

CHAPTER 2

ACHIEVEMENT INFORMATION FOR CHAPTER 1 LEA PROGRAMS

This chapter presents achievement information on Chapter 1 LEA programs for 1985-86, and describes changes in achievement from 1984-85 to 1985-86 and seven-year trends (1979-80 to 1985-86). The information is presented in the following order: number of states reporting, percentage of Chapter 1 students tested, achievement results in reading (annual test cycle, fall-spring test cycle) for 1985-86, achievement results in mathematics (annual test cycle, fall-spring test cycle) for 1985-86, changes in achievement from 1984-85 to 1985-86, and seven-year trends in achievement.

NUMBER OF STATES REPORTING

Forty-seven states, the District of Columbia, and BIA continued to use the standard reporting format required under ESEA Title I.

Information on the achievement of Chapter 1 participants for 1985-86 was received from 49 states, the District of Columbia, Puerto Rico, and the Bureau of Indian Affairs. (Tennessee did not submit any achievement information.)

For national comparisons and consistency across states in reporting this information, the District of Columbia, BIA, and the 47 states that continued to use the standard reporting format required under ESEA Title I were included in this report.¹² The Title I reporting format called for membership, number tested, posttest normal curve equivalent (NCE) score, and NCE gain score.¹³

States reported achievement in reading and mathematics for grades 2 through 12 using either a fall-spring schedule or an annual (fall-fall or spring-spring) cycle. Most states reported students tested with both types of testing cycles; of

¹²Georgia's data could not be categorized by test cycle, New Hampshire's data were grouped by individual Chapter 1 program only, and due to the nature of the tests given by Puerto Rico, its achievement data were not comparable to that provided by the states.

¹³The NCE is a type of standard score resulting from the division of the normal curve into 99 equal units, and is derived from the percentile rank. The 50th percentile (i.e., an NCE of 50) is the national norm. See Figure D.1 in Appendix D for a graphic depiction of the relationship between NCEs and percentiles.

the 47 states, D.C., and BIA included in the analysis, 45 tested Chapter 1 participants on a fall-spring cycle, and 43 tested on an annual cycle.

PERCENTAGE OF CHAPTER 1 STUDENTS TESTED

Sixty-seven percent of Chapter 1 students in grades 2 through 12 that received reading were tested in reading, and 61 percent that received mathematics were tested in mathematics.

To examine the percentage of Chapter 1 students receiving reading (and mathematics) for which complete achievement information in reading (and mathematics) was available, the following calculations were performed: (1) the distribution of public school participants by grade was calculated for each state; (2) the numbers of public school participants receiving reading (and receiving mathematics) were multiplied by the percentages from step 1 for each grade and for each state; (3) the numbers of participants in pre-k, kindergarten and first grade were subtracted from the totals in step 2; and (4) the national totals for the number receiving reading (and the number receiving mathematics) were calculated by adding the figures by grade for each state. The number tested in each subject area reflects the sum of the number tested for each test cycle.¹⁴

For grades 2 through 12 combined, 67 percent of Chapter 1 students that received reading were tested in reading, and 61 percent of Chapter 1 students that received mathematics were tested in mathematics. In reading, 70 percent or more were tested in grades 2 through 5; the lowest percentage was 43 percent in grade 10. In mathematics, over 70 percent were tested in grade 5; the lowest percentage was 41 percent in grade 10. (Table 2.1)

ACHIEVEMENT RESULTS IN READING, 1985-86

For Chapter 1 students tested in reading, for both test cycles, gains were reported in all grades except one.

¹⁴In states that provided achievement information based on a sample of school districts, the number tested was weighted to reflect the sample.

Annual Test Cycle

In 1985-86, for Chapter 1 students tested in reading on an annual test cycle, gains were reported in all grades except one, with a high of 3.5 NCEs in grade 6 and a low of -.3 NCE in grade 12. Chapter 1 students in grades 4 through 6 generally showed the largest gains (from 3.1 to 3.5 NCEs). Pretest percentiles ranged from a low of 19 in grades 10 and 11 to a high of 28 in grade 2. The range in posttest percentiles was from a low of 20 in grade 12 to a high of 30 in grade 2. (Table 2.2)

Fall-Spring Test Cycle

For Chapter 1 students tested in reading on a fall-spring cycle in 1985-86, gains were reported in all grades, ranging from 9.8 NCEs in grade 2 to 3.5 NCEs in grade 12. Chapter 1 students in the elementary grades (grades 2 through 6) showed the highest gains (from 6.6 to 9.8 NCEs). The range of pretest percentiles was from a low of 16 in grade 11 to a high of 21 in grades 4, 5, and 6. Posttest percentiles ranged from a low of 21 in grade 11 to a high of 36 in grade 2. (Table 2.3)

ACHIEVEMENT RESULTS IN MATHEMATICS, 1985-86

For Chapter 1 students tested in mathematics, for both test cycles, gains were reported in all grades.

Annual Test Cycle

In 1985-86, for Chapter 1 students tested in mathematics on an annual test cycle, gains were reported in each grade, ranging from a high of 5.3 NCEs in grade 5 to a low of 1.1 NCEs in grade 12. Participants in grades 2 through 7 showed the highest gains (NCE gains of 3.6 to 5.3). Pretest percentiles ranged from a low of 26 in grades 5 and 7 to a high of 33 in grade 12. The range of posttest percentiles was a low of 30 in grade 9 and a high of 39 in grade 2. (Table 2.4)

Fall-Spring Test Cycle

For Chapter 1 students tested in mathematics on a fall-spring schedule in 1985-86, gains were reported in all grades, ranging from 13.6 NCEs in grade 2 to 3.6 NCEs in grade 12. As with reading/fall-spring test cycle and mathematics/annual test cycle, participants in the elementary grades (grades 2 through 6) were reported making the highest gains (from 8.8 to 13.6 NCEs). The range of pretest percentiles was a low of 18 in grades 10 and 11 and a high of 23 in grade 8. Posttest

percentiles ranged from a low of 25 in grades 10 and 11 to a high of 44 in grade 2. (Table 2.5)

CHANGES IN ACHIEVEMENT FROM 1984-85 TO 1985-86

Posttest percentiles increased for Chapter 1 students tested in reading and mathematics on an annual test cycle, while decreases were experienced for Chapter 1 students tested in mathematics on a fall-spring test cycle.

From 1984-85 to 1985-86, Chapter 1 students tested in reading and in mathematics on an annual test cycle showed increases in their posttest percentiles. In mathematics, increases were seen in nine grades and no change in two grades, and in reading, increases were seen in eight grades, with no change in two grades, and a decrease in one grade. (Tables 2.6 through 2.9)

Chapter 1 students tested on a fall-spring test cycle in mathematics showed decreases in their posttest percentiles from 1984-85 to 1985-86. Decreases were seen in eight grades, an increase in one grade, and no change in two grades. No consistent pattern emerged for participants tested on a fall-spring test cycle in reading, where there were decreases in four grades, increases in five grades, and no change in two grades. (Tables 2.6 through 2.9)

TRENDS IN ACHIEVEMENT FROM 1979-80 TO 1985-86

Chapter 1 students experienced gains, expressed in NCEs, across the seven years in both reading and mathematics. In most instances, gains reported in 1985-86 were higher than the gains reported in 1979-80.

Achievement information for school years 1979-80 to 1985-86 shows that, with very few exceptions, Chapter 1 students experienced gains (expressed in NCEs) across all seven years, annual and fall-spring testing cycles, and for both reading and mathematics. Only 2 percent of the scores were negative. (Tables 2.6 through 2.9)

In most instances, gains reported in 1985-86 were higher than the gains reported in 1979-80. Specifically, there were increases (in NCE gain scores) from 1979-80 to 1985-86 in nine (of the 11) grades for those Chapter 1 students tested in reading (for both test cycles), in nine grades for those Chapter 1 students tested in mathematics on an annual cycle, and in seven grades for those tested in mathematics on a fall-spring test cycle. (Tables 2.6 through 2.9)

Pretest percentiles, an indicator of the achievement level at which the Chapter 1 students begin, have stayed fairly constant over the seven-year period, and have been well below the norm. (Tables 2.10 and 2.11)

Table 2.1

Number of Chapter 1 Public School Participants Receiving Reading and Mathematics Services, and Number of Chapter 1 Students Tested, by Subject Area and by Grade -- 1985-86

Grade	Number Receiving Reading ^{a/}	Weighted Number Tested for Reading ^{b/}	Percent	Number Receiving Mathematics ^{a/}	Weighted Number Tested for Mathematics ^{b/}	Percent

12	28,849	13,914	48	17,228	7,918	46
Total	2,502,941	1,668,934	67	1,477,437	897,967	61

^{a/} The following steps were performed to calculate the numbers in these columns: (1) the distribution of public school participants by grade was calculated for each state; (2) the numbers of public school participants receiving reading and receiving mathematics were multiplied by the percentages from step 1 for each grade and for each state; (3) the numbers of participants in pre-k, kindergarten and first grade were subtracted from the totals in step 2; and (4) the national totals for the number receiving reading and the number receiving mathematics were calculated by adding the figures by grade for each state.

^{b/} Both test cycles combined. In states that provided achievement information based on a sample of school districts, the number tested was weighted to reflect the sample.

CHAPTER 3

ALLOCATION AND COST INFORMATION FOR CHAPTER 1 LEA PROGRAMS

This chapter presents national and state-by-state information on the funding for Chapter 1 LEA programs for the 50 states, the District of Columbia, Puerto Rico, and the Bureau of Indian Affairs. Allocations and Chapter 1 dollars per participant as well as a comparison of the number of Chapter 1 participants and the number of students counted in the Chapter 1 LEA allocation formula are presented.

CHAPTER 1 ALLOCATIONS

Funding for Chapter 1 LEA programs was nearly \$3.2 billion in 1985-86, an increase of 7 percent from 1984-85.

Nationally, there was a 7 percent increase in funding for Chapter 1 LEA programs between 1984-85 and 1985-86, from nearly \$3.0 billion to nearly \$3.2 billion. (Table 3.1)

In 1985-86, state allocations ranged from \$3.9 million in Wyoming to \$337.7 million in New York. Only two states (Louisiana and North Dakota) experienced a decrease in funding between 1984-85 and 1985-86 (of 4 percent and less than 1 percent, respectively). Increases in funding ranged from a low of 1 percent in Arizona to a high of 22 percent in Washington. Funding in 1985-86 exceeded the 1984-85 amount by 10 percent or more in seven states, while seven states experienced funding increases of less than 5 percent. (Table 3.1)

CHAPTER 1 DOLLARS PER PARTICIPANT

The Chapter 1 dollars per participant figure was \$704 in 1985-86, a 6 percent increase from the 1984-85 figure of \$665.

Nationally, the Chapter 1 dollars per participant figure in 1984-85 was \$665, while in 1985-86 it was \$704, a 6 percent increase.¹⁵ (Table 3.2)

In 1985-86, Chapter 1 dollars per participant ranged from lows of \$403 in Puerto Rico and \$432 in Indiana to highs of \$1,499 in BIA, \$1,214 in Alaska and \$1,141 in Iowa. Only three states had Chapter 1 dollars per participant of under \$500, while nine states had Chapter 1 dollars per participant of \$900 or more. (Table 3.2)

Thirty-seven states, the District of Columbia, and BIA experienced an increase in the Chapter 1 dollars per participant between 1984-85 and 1985-86. The increases ranged from 1 percent in Alaska, Idaho, and North Dakota to 24 percent in Maine and BIA.¹⁶ (Table 3.2)

Decreases in the Chapter 1 dollars per participant (experienced in 13 states) ranged from less than 1 percent in New Mexico to 13 percent in Nebraska.¹⁷ (Table 3.2)

STUDENTS COUNTED IN THE CHAPTER 1 ALLOCATION FORMULA

The number of Chapter 1 participants was 56 percent of the number of students counted in the Chapter 1 allocation formula.

¹⁵The Chapter 1 dollars per participant figures were computed in the following way: the allocation to the state for a given year was divided by the number of Chapter 1 participants the state reported during that year. The allocation information was obtained from the ED Budget Office.

Since the number of public school participants were adjusted for California, the national 1984-85 Chapter 1 dollars per participant figure has changed from the figure previously reported.

¹⁶Since Georgia samples its school districts for participation information, the increase of 48 percent in the Chapter 1 dollars per participant in that state may be due to the inclusion or exclusion of districts from one year to the next.

¹⁷Since Arizona samples its school districts for participation information, the decrease of 27 percent in the Chapter 1 dollars per participant in that state may be due to the inclusion or exclusion of districts from one year to the next.

Nationally, in 1985-86, the number of Chapter 1 participants was 56 percent of the number of students counted in the Chapter 1 LEA allocation formula. The percentage varied from 80 percent (in Indiana) to 36 percent (in South Carolina). (Table 3.3)

In nearly two-thirds of the states, the number of Chapter 1 participants was between 50 and 70 percent of the number of students counted in the Chapter 1 LEA allocation formula. (Table 3.3)

CHAPTER 4

INFORMATION ON STATE AGENCY NEGLECTED OR DELINQUENT PROGRAMS FOR 1985-86

This chapter presents information on the Chapter 1 State Agency Neglected or Delinquent (N or D) programs for 1985-86. Information is reported on the number of Chapter 1 participants by institutional designation (neglected, delinquent, and adult correctional), age span, service area, and ethnic classification. The chapter concludes with a discussion of the state allocations for this program.

PARTICIPATION BY INSTITUTIONAL DESIGNATION

Nearly two-thirds of the almost 53,000 N or D participants were classified as delinquent.

There were almost 53,000 State Agency N or D participants in 1985-86. Of these, 61 percent were classified as delinquent Chapter 1 participants, 35 percent were adult correctional Chapter 1 participants, and 4 percent were neglected Chapter 1 participants. (Table 4.1)

PARTICIPATION BY AGE SPAN

Over one-half of the N or D participants were 17 through 21 years old.

Across all N or D participants, 57 percent were 17 through 21 years old, 39 percent were 14 through 16 years old, and 5 percent were 10 through 13 years old. By institutional designation, 60 percent of the neglected participants and 58 percent of the delinquent participants were 14 through 16 years old, whereas 98 percent of the adult correctional participants were 17 through 21 years old. (Table 4.1)

PARTICIPATION BY SERVICE AREA

Over two-thirds of N or D participants received reading services and almost two-thirds received mathematics services.

In 1985-86, over 60 percent of all N or D participants received reading and mathematics services. Over two-thirds of the neglected and the delinquent participants and over one-half of the adult correctional participants received reading and mathematics. About one-quarter of the participants in each institutional designation category received other language arts. (Table 4.2)

Of the supporting services, the largest percentage of N or D participants--20 percent--were provided attendance, social work, and guidance services. By institutional designation, attendance, social work, and guidance services were provided to 27 percent of the neglected participants, and 20 percent of the delinquent and adult correctional participants. Health and nutrition services were received by 14 percent of the neglected participants, and no other supporting service served more than 8 percent of the Chapter 1 participants. (Table 4.2)

PARTICIPATION BY ETHNIC CLASSIFICATION

Almost one-half of N or D participants were black.

The ethnic classification of N or D participants shows that 46 percent of the State Agency N or D participants in 1985-86 were black, 36 percent were white, 15 percent were Hispanic, and 1 percent were American Indian or Alaskan Native. (Table 4.3)

CHAPTER 1 STATE AGENCY N OR D ALLOCATIONS

Funding for Chapter 1 State Agency N or D programs was \$32.6 million.

Nationally, the funding for the Chapter 1 State Agency N or D programs in 1985-86 for the 50 states, the District of Columbia, and Puerto Rico was \$32.6 million. The state allocations ranged from \$16,674 in Rhode Island to almost \$4.3 million in New York. Eleven states received allocations of over \$1 million, while 29 states, the District of Columbia, and Puerto Rico had allocations under \$500,000.

^{a/} Allocation information obtained from the ED Budget Office.

APPENDIX A

METHODOLOGY

The U.S. Department of Education (ED) received State Performance Reports for 1985-86 in the winter and early spring of 1987, and proceeded to enter the participation information into Lotus 1-2-3 files and perform internal consistency checks on the data. Such checks included verifying that the totals for gender, year of birth, racial/ethnic group, grade, and service area equalled the sum of their parts. ED also examined year-to-year consistency in the submitted information. Any necessary changes were made to the data as a result of these checks.

Decision Resources Corporation (DRC), contracted by the Office of Planning, Budget, and Evaluation (OPBE) to review, correct, and summarize the State Performance Reports, entered the achievement information into Lotus 1-2-3 files and performed edit checks on both the participation and the achievement information. The purpose of the edit checks was to flag potential problems, not to claim that the information was necessarily in error.

For the participation data, changes in the numbers reported from 1984-85 to 1985-86 were examined. Changes that appeared to be unusually high, taking into consideration the absolute numbers in both years, were highlighted by the edit process. During the review process it was decided not to highlight any changes in the nonpublic participation numbers due to the impact of the Aguilar v. Felton decision on the reporting for the 1985-86 school year.

For the achievement data, NCE gain scores (1985-86) that deviated greatly (two standard deviations) from the previous year's (1984-85) national NCE gain score, by grade, test cycle, and subject area, were examined. For example, the 1984-85 national NCE gain score for grade 2, fall-spring test cycle, reading was 9.3. Gain scores (1985-86) above 14.5 and below 4.1 were two standard deviations from the 9.3 score, and would have been highlighted by the edit process.

DRC subsequently prepared state-by-state listings of the information submitted by the SEAs, highlighting any data items that were identified through the edit process, and sent them to the SEAs for their review.

DRC staff then placed telephone calls to each SEA to elicit their response. In several instances, SEAs revised data for either 1984-85 or 1985-86.¹⁸ However, in most cases, the SEA responded that the information had been reviewed and was correct, or the SEA offered explanations for data items highlighted by the review process.

At the conclusion of this process, DRC entered the revisions into the Chapter 1 data base and produced two documents for ED--a State Feedback Report for each SEA and this summary report entitled A Summary of State Chapter 1 Participation and Achievement Information for 1985-1986.

¹⁸As discussed previously, the public school participation and staffing figures for California were adjusted (for 1979-80 to 1985-86) and to the extent other states revised their figures, the numbers found in this report do not correspond with those found in previous documents displaying State Performance Report information.

APPENDIX B

SELECTED PARTICIPATION INFORMATION BY STATE FOR 1979-80 TO 1985-86

This appendix presents state-by-state tables of selected participation information for 1979-80 to 1985-86. The tables are provided in the following order:

- o Table B.1 -- the number and percent of public and nonpublic participants, as well as the number of total participants;
- o Table B.2 -- the number and percent of public and nonpublic participants who received reading and mathematics; and
- o Table B.3 -- the number and percent of total FTE staff who were administrators, teachers, or teacher aides.

Table B.1

Number and Percent of Public and Nonpublic School
Participants, by State -- 1979-80 to 1985-86

		TOTAL PUBLIC PARTICIPANTS	%	TOTAL NONPUBLIC PARTICIPANTS	%	TOTAL PARTICIPANTS
Nation	1979-80	4,772,403	96	189,114	4	4,961,517

APPENDIX C

ADDITIONAL ACHIEVEMENT INFORMATION FOR 1985-86

This appendix provides additional tables displaying the achievement information for 1985-86. One set of tables--Tables C.1 through C.4--presents the pretest percentiles, the posttest percentiles, and the NCE gain scores by grade, for the nation, and the highest and lowest scores.

A second set of tables--Tables C.5 through C.8--displays the pretest percentiles and gain scores by state and by grade, ranked by pretest percentile. A third set of tables--Tables C.9 through C.12--displays the posttest percentiles and gain scores by state and by grade, ranked by posttest percentile.

A final set of tables--Tables C.13 through C.16--presents state-by-state and grade-by-grade listings of the following achievement information: sample weight, membership, weighted number tested, pretest NCE, pretest percentile, posttest NCE, posttest percentile, and gain NCE.

In each set, the tables are provided in the following order:

- o annual reading;
- o fall-spring reading;
- o annual mathematics; and
- o fall-spring mathematics.

Table C.1

Reading Achievement Pretest Percentiles, Posttest Percentiles, and NCE
Gain Scores for Chapter 1 Students Tested on an Annual Schedule -
National, Lowest and Highest Standing -- 1985-86 ^{a/}

Grade	Pretest Percentiles			Posttest Percentiles			NCE Gain Scores		
	National	Lowest	Highest	National	Lowest	Highest	National	Lowest	Highest
2	28	17	44	30	21	46	1.1	-4.3	9.3
3	24	7	44	28	11	44	2.8	-2.0	9.2
4	24	13	43	29	20	45	3.1	-6.7	12.9
5	23	11	37	28	17	43	3.1	-2.0	8.4
6	23	9	37	28	15	43	3.5	-3.5	7.4
7	22	6	35	26	10	39	2.6	-2.8	9.4
8	21	6	39	25	9	39	2.6	-7.5	8.8
9	21	7	38	24	7	38	2.4	-3.7	15.3
10	19	5	40	21	5	44	1.3	-9.4	17.8
11	19	5	64	22	7	70	1.8	-9.5	11.2
12	20	1	44	20	4	64	-0.3	-5.5	24.0

^{a/} Values at the extremes are frequently a function of small numbers of Chapter 1 students tested.

Table C.2

Reading Achievement Pretest Percentiles, Posttest Percentiles, and NCE
Gain Scores for Chapter 1 Students Tested on a Fall-Spring Schedule -
National, Lowest and Highest Standing -- 1985-86 ^{a/}

Grade	Pretest Percentiles			Posttest Percentiles			NCE Gain Scores		
	National	Lowest	Highest	National	Lowest	Highest	National	Lowest	Highest
2	20	6	34	36	13	51	9.8	-1.5	16.0
3	20	8	32	33	12	48	8.2	1.9	12.3
4	21	8	46	32	11	64	7.5	-0.3	11.5
5	21	9	43	31	11	55	6.6	2.2	10.1
6	21	8	32	31	11	40	6.6	3.4	11.3
7	19	8	30	28	13	42	5.8	2.5	10.9
8	19	5	29	27	8	40	5.7	1.0	9.1
9	18	4	30	24	2	39	4.6	-6.4	7.9
10	17	2	33	22	2	46	4.2	-3.2	19.0
11	16	2	45	21	4	45	3.9	-0.4	26.0
12	18	4	68	22	5	87	3.5	-8.0	16.2

^{a/} Values at the extremes are frequently a function of small numbers of Chapter 1 students tested.

APPENDIX D

ADDITIONAL NATIONAL ACHIEVEMENT INFORMATION FOR 1979-80 TO 1985-86

This appendix provides data on the numbers of students tested and the numbers of states reporting achievement data from 1979-80 to 1985-86. In Tables D.1 and D.2, the numbers of students tested are presented for annual and fall-spring testing cycles, respectively. Tables D.3 and D.4 present the number of states for each year providing achievement data for annual and fall-spring testing cycles, respectively. Finally, Figure D.1 provides a graphic depiction of the normal curve equivalent score.

Table D.1
